

WPI

Worcester Polytechnic Institute Center for Industrial Mathematics and Statistics

Research Experience for Undergraduates (REU) in Industrial Mathematics and Statistics

May 28 - July 26, 2024

The REU Program is run under umbrella of WPI Center for Industrial Math and Statistics (CIMS). CIMS mission is to build partnerships between WPI, industry, and the general mathematical community that benefit its students, its faculty, and its sponsors.

- REU students work in teams on real problems that come directly from business and industry.
- They work closely with a company representative to define the problem and to develop solutions of immediate value to the company.
- They are guided by a faculty advisor to maintain a clear focus on the mathematical issues at the core of the project.
- CIMS REU Program is open for projects of interdisciplinary nature that relate to science, engineering, finances, etc. and require the use of applied math, statistics, data sciences, etc.

This REU program aims to answer questions like:

- *What is the role of a mathematician in business and industry?*
- *What is it like to work with technical experts on a problem that requires significant mathematics but also must satisfy real-world constraints?*

Each participant will receive a \$5,500 stipend and housing for the duration of the program, along with support to defray the cost of travel to Massachusetts.

For more info, visit: <https://labs.wpi.edu/cims/initiatives/reu/>

Apply online at <https://www.mathprograms.org/> (starting December 2023).

Applications will be reviewed until March 15, 2024, or until all positions are filled.

Funded by the National Science
Foundation Award DMS-2244306 &
WPI Center for Industrial
Mathematics and Statistics (CIMS)
